Our Goal

Restoring Youthful Looks and Natural Beauty

Our principal goal is to help YOU—whatever your skin problems are! To attain this goal, our staff meets the highest standards in patient care through continuing education, new techniques, and investing in the latest equipment so we can help you get the best results. Each member of our team takes pride in his or her personal contribution to your success.

The comments received from our patients say it best – expressing appreciation for their results, as well as the thoughtful, caring treatment they have received, and in the frequency with which they recommend Dr. Amiry to friends and family.

Mission

The mission of the Center for Cosmetic Dermatology is to help people build a healthy image so that they may look and feel more confident and attractive. We accomplish this goal by using minimally invasive cosmetic procedures and products while providing a warm, compassionate, and welcoming environment. Our team is dedicated to empathetically listening to our patient's wants and needs so that we may develop a customized program of skin care and total wellness. We also strive to find ways to continuously support our clients in developing and leading a healthy lifestyle.

Biography

Dr. Syed Amiry has established one of the most well-respected dermatology practices in Northern Virginia while serving quality-conscious patients in the metropolitan Washington, D.C. area.

His dermatology practice began in 2003, when he moved from Los Angeles where he was working with Murad Medical Group and offering cosmetic services to some of the most prominent people in the entertainment industry.

His success in the areas of general and cosmetic dermatology has brought him a significant number of clients, and he has designed his cosmetic dermatology practice to ensure their complete satisfaction.

Dr. Amiry has assembled a large, extremely devoted staff of top professionals and experts in their particular cosmetic dermatology procedures, whose dedication to quality care is without parallel. In this way he has achieved his goal: to offer unrivaled personal service to each of his dermatology clients.

Laser Facial Rejuvenation

Men and women of all ages are currently seeking better alternatives to maintaining healthy, youthful skin. Using a combination of medical lasers and intense pulsed light technologies, the Center for Cosmetic Dermatology has the ability to provide non-invasive, no down-time treatments for certain benign skin conditions. If you suffer from broken blood vessels or capillaries/rosy cheeks, spider veins, birthmarks, port wine stains, Rosacea, or pigmented lesions such as age spots, sun spots and uneven pigmentation, our laser skin treatments will provide the safe and effective alternatives you have been looking for. Enjoy a more youthful appearance with skin rejuvenation through the treatments at the Center for Cosmetic Dermatology.

Laser Facial Rejuvenation is a new non-ablative treatment (ablative treatments damage the epidermis while non-ablative do not) which works to repair collagen in the dermis, or deepest layer of the skin, while gently erasing signs of aging in the top layer of the skin. This exceptional laser treatment selectively delivers amplified pulses of light to the dermis, causing stimulation of existing collagen. There is virtually no discomfort or outer signs that the skin is being rejuvenated as compared with other traditional ablative procedures.

Laser Facial Rejuvenation at the Center for Cosmetic Dermatology is a life changing experience.

Lines & Wrinkle Treatments

BOTOX® Cosmetic

Looking for immediate results that creams and lotions can't deliver? BOTOX® Cosmetic is a therapeutic muscle-relaxing agent that enhances your beauty. Nothing compares with the often dramatic improvements that result from a few simple injections of BOTOX® Cosmetic. Areas that can be improved with this procedure include crows feet (corners of eyes), eyebrows, forehead, frown lines, and neck. If wrinkles, stress, and sun-damage are making you look older and more tired than you feel, it may be time to express the real you with BOTOX® Cosmetic.

Restylane® and Perlane® "a natural beauty lift - instantly!"

You notice it in the mirror - those lines and wrinkles as they creep in. Your face begins to lose its shape and definition as skin folds start to take over and that baby soft smoothness is replaced with those unwanted signs of aging. Restylane® and Perlane are long lasting cosmetic fillers that provide dramatic results for improving the appearance of facial lines, wrinkles and folds. This is a non-surgical solution to soften facial lines and wrinkles, restore volume and fullness to the skin, plump up lips, and fill in scars. The cosmetic results are visible immediately bestowing upon you a more youthful and invigorated look.

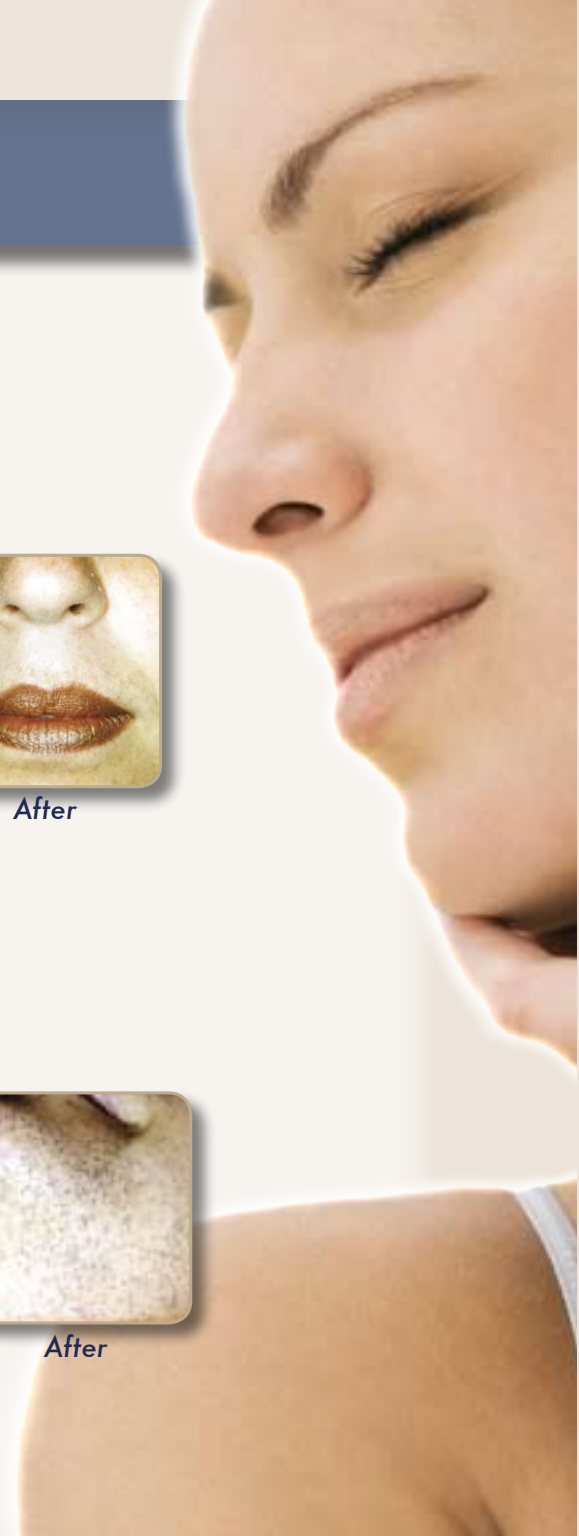

Laser Hair Removal

Tired of the expensive, messy and painful waxing sessions, only to have those unwanted hairs return in no time? An advanced technology has been developed to replace these antiquated methods.

Laser Hair Removal treatment has been specifically designed to eliminate undesired hair from all parts of the body. Unlike many other treatment methods, Laser Hair Removal leaves your skin looking and feeling smoother and softer!

Dr. Amiry and his highly trained staff have been performing Laser Hair Removal since 1991 with this FDA approved technology. Through a series of treatments, unwanted facial and body hair is permanently reduced! New hair growth is virtually non-existent and any new hairs are very soft and fine; not sharp and coarse like shaved or waxed hair. Women and men of all ethnic origins benefit from this treatment. No more razor bumps! No more distressing hair where it doesn't belong!

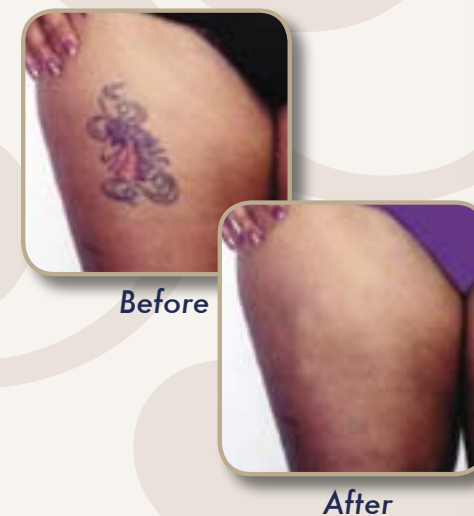

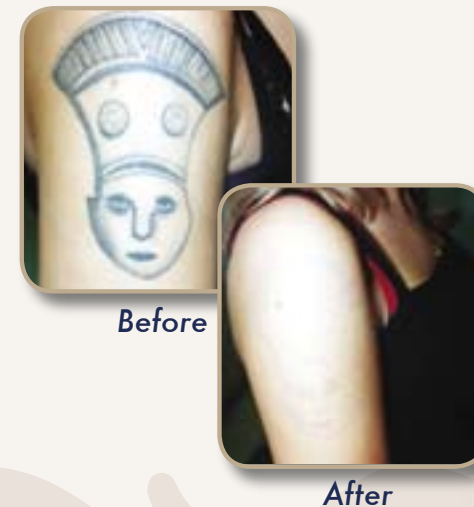

Tattoo Removal

At the time it was exciting and adventurous to walk into that tattoo parlor and swap names on each other's chest to profess your love. Or on that trip to Mexico, the time you got an Incan symbol etched on your leg. Now that some years have passed and you feel remorseful about those impulses, you want to know if there is the possibility of having it removed completely, quickly and safely. The answer is yes. Today's advanced laser technology provides the means for your tattoo to be removed safely and in most cases, without leaving a scar.

Laser energy is directed at the tattooed area, passing harmlessly through the outer layer of the skin and targeting the tattoo ink directly. The laser disrupts the ink, allowing your body to absorb it and break it down naturally.

Size, color, location and the age of the tattoo determine the number of treatments necessary to effectively complete removal. During the consultation, the tattoo you want treated will be examined and any questions you have will be answered. Be sure to contact our office if you experience side effects not described during your consultation.

Fat / Cellulite Reduction

Mesotherapy

We understand that you want to rid yourself of those "love handles" and pockets of fat that simply won't disappear with diet and exercise. We also know that you want to avoid the pain and discomfort of traditional procedures.

A revolutionary new aesthetic treatment that functions as a no "down-time" alternative to those traditional cosmetic procedures has arrived. Mesotherapy is an exciting new treatment that eradicates unwanted cellulite and localized pockets of fat quickly, effectively, and without being poked or prodded. Mesotherapy safely "melts" the fat cells away, creating a smoother, sleeker you, with no effort and no "down-time." You will look and feel 10 years younger. You and friends alike will be amazed at the significant loss of inches in the exact areas where you need it most!

Tumescent Liposuction

The days of major recovery time from liposuction surgery are long gone. Tumescent Liposuction has leaped onto the scene as the most important advancement in this procedure. With the expertise of Dr. Amiry, Tumescent Liposuction is an extremely safe surgery, and the end result is quite dramatic. The technique produces smoother results while greatly decreasing risk, expense and postoperative discomfort. Those unwanted bulges created by excess localized fat deposits are removed in a one-day, outpatient procedure. Now spend the time you would have taken for recovery on that vacation of your dreams.

You will see a world of difference immediately after surgery. Even more improvement will be seen after most of the swelling has subsided. With regular exercise and a healthy diet, you will easily maintain your slimmer figure or leaner physique.

The technique can be used on any area of the body, but is commonly used on areas that require enhanced precision, such as the face, neck, jowls, arms, abdomen, buttocks, thighs, and knees.

Skin Tightening with Accent™

Accent™ is an exciting new cosmetic procedure that provides a virtually pain-free, non-surgical alternative for tightening loose skin and wrinkles. This FDA approved "warm massage" treatment uses radiofrequency energy to stimulate the production of new collagen, improving body contours. Not only will you be looking good shortly after your first treatment, but your new reshaped body will continue its steady improvement from the effects of the procedure. Accent™ is typically used to treat forehead wrinkles, eyebrows, cheeks and jowls, nasolabial folds, neck, abdomen, thighs, and buttocks. Be sure to ask about other parts of the body that can be treated as well during your consultation session.

- Enjoy immediate results with minimal discomfort
- Minimal risk
- Firmer skin with fewer fine lines and wrinkles
- No down-time

Vein Therapy

Experience does make a difference...and at the Center for Cosmetic Dermatology, we are one of the most experienced practices in the area dealing with vein therapy. Our treatment package combines options of both Sclerotherapy and laser treatments to eliminate the pain, fatigue and swelling found in varicose veins, and remove the embarrassing "road map" of spider veins, safely and effectively, with minimal "down-time."

Sclerotherapy

Sclerotherapy was developed over 75 years ago and at present, is one of the most effective treatments for spider and varicose veins. Sclerotherapy is an injection method using a solution injected directly into the vessels. Treatment can last from 15 to 45 minutes, depending on the number of veins treated in a particular session. The solution attacks and destroys those unsightly varicose veins. Not all varicose veins can be treated with Sclerotherapy.

Laser Therapy

When Sclerotherapy is not the solution, we turn to our FDA approved laser that targets the vessels directly - effectively removing them. The laser produces a unique wavelength of light that safely passes through the skin and is selectively absorbed by the targeted blood vessel. The vein will gradually disappear, leaving the skin intact. Get ready for your summer and upcoming social season without those vexing veins!

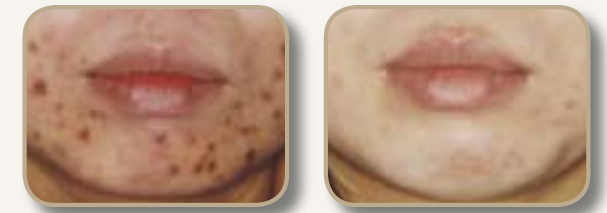

Acne Treatments

Acne pops up on our skin at the most unlikely of times; right before a date, a night out with friends, or a major event. Chronic acne problems are embarrassing and can take a toll on your self-esteem.

Let the Center for Cosmetic Dermatology revive your self-confidence. No longer dread walking out of the house. Come in today to discuss the best modalities and or a combination thereof to eradicate those, whiteheads, blackheads, pimples, or acne scars.

Microdermabrasion

Men, women, and teens all share a common desire: to have healthy, youthful skin. Microdermabrasion is a selective and controlled mechanical peel exfoliating the top layer of dead skin cells, stimulating cell renewal and collagen production. A series of treatments combined with a hydrating masque maximizes your results! Your skin will feel and look fresh and smooth! Best of all, there is no "down-time." Resume regular activities immediately!

*D*escriptions of our Signature Clinical Skincare treatments are listed on our treatment card.

- PCA Peel® Exfoliating Treatment
